

Indexing and Archiving of Journals

GENARO V. JAPOS, PhD, DM, EdD, DHRM, DODT

Philippine Association of Institutions for Research, Inc.

What are Indexed Journals?

***INDEXED JOURNALS** are journals which get included in the catalogues of **PRESTIGIOUS** publishers after passing the evaluation of an independent **CONTENT SELECTION COMMITTEE**.*

The journal, when indexed, appears in the Publishers' database.

What are Indexed Journals?

*The journals continue to be in the Journal Masterlist when citations **remain strong**; otherwise, the Journal Title is **dropped** by the next year.*

Publishers distribute the journals across the world.

Examples of Indexing Companies

ELSEVIER
Scopus

Clarivate
Analytics

ProQuest®

 **EBSCO**host

Less Searching. More Finding.

What are thesis and dissertation repositories?

Repositories are digital online archives of thesis/dissertation maintained by University Libraries and other independent publishers.

Repositories of independent publishers are accessible for a fee while repositories of universities are open-access.

*Repositories allow scholars to read the **FULL MANUSCRIPT** from cover-to-cover.*

*The **Philippine Electronic Journals**  has now included a **thesis/dissertation repository** where deans and students can deposit their manuscript. The main advantage is the writers can be cited even if the thesis is not published in a journal.*
